I'm Gökhan, a 19-year-old software engineer with a passion for learning new things and embracing fresh ideas. Currently, I am a high school student exploring the dynamic world of Next.js and Typescript.

WORK EXPERIENCE

Front-end Developer   Aug 2023 - Present
Kişilerarası İlişkiler Psikoterapisi Derneği

- Redesigned the organization's website using React, focusing on user-friendly navigation and accessibility to improve user engagement.
- Developed and implemented interactive UI components to ensure a seamless experience for visitors seeking therapeutic resources.
- Led the development of responsive web designs optimized for various devices, resulting in a significant increase in mobile traffic and engagement.

Full-stack Developer   Feb 2024 - Present
discord.place

- Developed and maintained the discord.place website using Next.js, ensuring high performance and responsiveness across different devices.
- Designed and styled interactive UI components using CSS, focusing on user-friendly navigation and accessibility.
- Engaged with the open-source community by reviewing pull requests, managing issues, and implementing feature requests, fostering a collaborative development environment for discord.place.
- Utilized modern web development practices and tools to streamline the development process and ensure code quality.
- Collaborated on the integration of third-party services, such as Cloudflare and MongoDB, to enhance website functionality and reliability.

Full-stack Developer   Jun 2024 - Present
lantern.rest

- Developed Lantern, a real-time service for broadcasting active Discord statuses via RESTful API and WebSocket, enhancing user engagement with dynamic content.
- Implemented seamless integration and real-time updates for Discord presence information, allowing users to display their current activities such as Spotify tracks on personal websites¥.
- Led the development and deployment of scalable, self-hosting solutions for Lantern, ensuring flexibility and ease of setup for diverse user needs.
- Engaged with the open-source community by reviewing pull requests, managing issues, and implementing feature requests, fostering a collaborative development environment for Lantern.
- Collaborated on the integration of third-party services, such as Cloudflare and MongoDB, to enhance website functionality and reliability.
